CLAUDE CODE SKILLS FOR TALKING-HEAD REELS

Reel *Kit*

Turn a long interview or talking-head video into finished 9:16 reels in your brand. It picks the hot takes, cuts a tight script, adds graphics on the right words, and checks every frame before you watch.

> Every demo in this guide uses an AI-generated person made with Higgsfield (Kling 3.0). She is not a real person.

102 TESTED EFFECTS · 80 MORE FROM THE HYPERFRAMES REGISTRY · 6 LOOKS · 4 SKILLS

How to use it

Install

Clone the repo and run the installer. It links five skills into Claude Code and checks ffmpeg, Node, Python and the face detector.

```
git clone
https://github.com/naticorrea-
03/reel-kit ~/reel-kit
cd ~/reel-kit && ./install.sh
```

Set up your brand

One interview, once. Your colors, fonts, logo, look, caption style and the things you never want to see. Saved to ~/.reel-kit/profile.json.

```
/reel-setup
```

Make reels

Point it at a long video. It reads the whole transcript, picks the hot takes, writes each clip as a script, plans one graphic per beat, cuts, renders and masters.

```
/reel-edit
~/Downloads/interview.mov
```

Check before you watch

Layout audit on every sixth of a second, words check, loudness, and beat sheets Claude reads itself. Errors block the render.

```
/reel-qa
```

Review and give notes

Your reels land on a review page in your brand. Approve or redo each one, pin a note to the exact second, or comment on one storyboard beat. Claude reads every note before the next round. It can be a private claude.ai page you share with a client, or a page on your Mac.

```
/reel-review
```

Browse effects

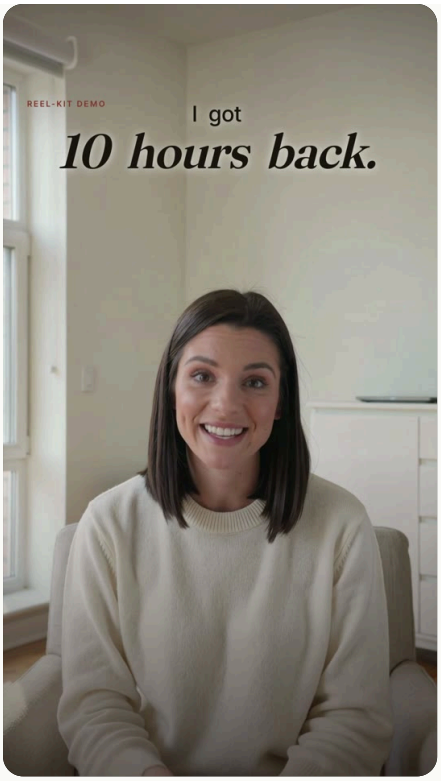

Ask for what you need in plain words. "Add a popup when she says follow me." It picks from the library below.

```
/reel-effects
```

Six looks

> The woman in every demo here is not a real person. She was generated with AI (Kling 3.0 on Higgsfield), voice included, so the kit could be shown without anyone's real footage.

Same 15 seconds of footage in every look, each with its own signature graphics. Pick one as your default in setup. Your brand colors and fonts replace the defaults shown here.

Editorial

Italic serif punch lines, word-pill captions, cream cards, warm grade.

USE FOR

Interviews, founders, anything that should feel premium and calm.

CAPTIONS

pill, lower case, 3 words max

GRADE

```
sepia(.10) saturate(1.04)
contrast(1.0)
brightness(1.03)
```

DEFAULT COLORS

Punch

Huge heavy words behind the head, two-word caption stacks, hard cut punches, high contrast.

USE FOR

Hot takes, numbers, energy. Feeds where the hook has one second.

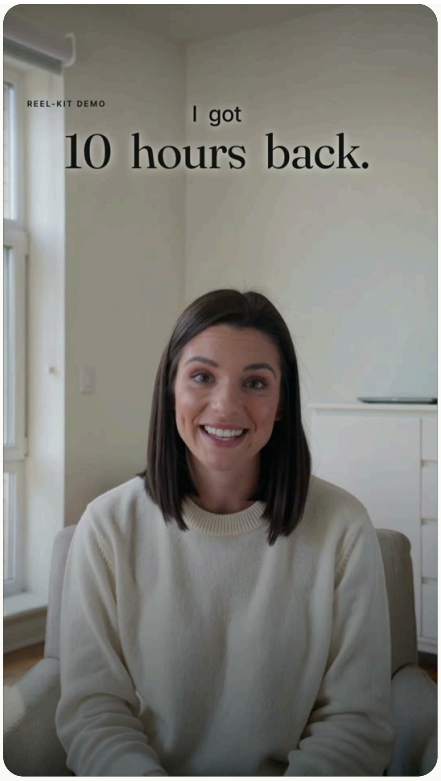

CAPTIONS

stack, upper case, 2 words max

GRADE

```
contrast(1.14) saturate(1.12)
brightness(1.01)
```

DEFAULT COLORS

Minimal

Small clean captions, lower-thirds, thin-rule cards, neutral grade, slow push-ins.

USE FOR

Documentary, teaching, expert explainers. Lets the person carry it.

CAPTIONS

clean, as-is case, 5 words max

GRADE

```
saturate(.94) contrast(1.02)
brightness(1.0)
```

DEFAULT COLORS

Golden Hour

Serif cover title with a handwritten line, tiny serif word captions, butter italic punch lines, orbiting tiles, honey grade.

USE FOR

Lifestyle, creators, digital products. Warm rooms and soft light.

CAPTIONS

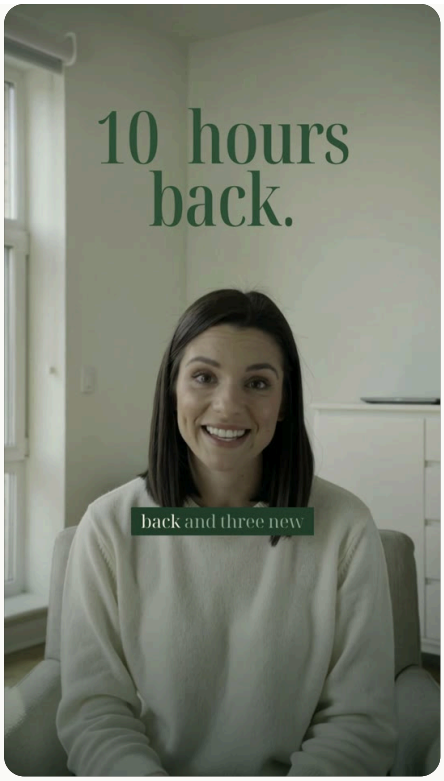

clean, lower case, 1 word max

GRADE

`sepia(.24) saturate(.84) contrast(.95) brightness(.97) hue-rotate(-3deg)`

DEFAULT COLORS

Masthead

Giant condensed serif title behind the head, tracked caps kicker, serif captions on a forest plate, muted olive grade.

USE FOR

Founders and opinion pieces that should read like a magazine cover.

CAPTIONS

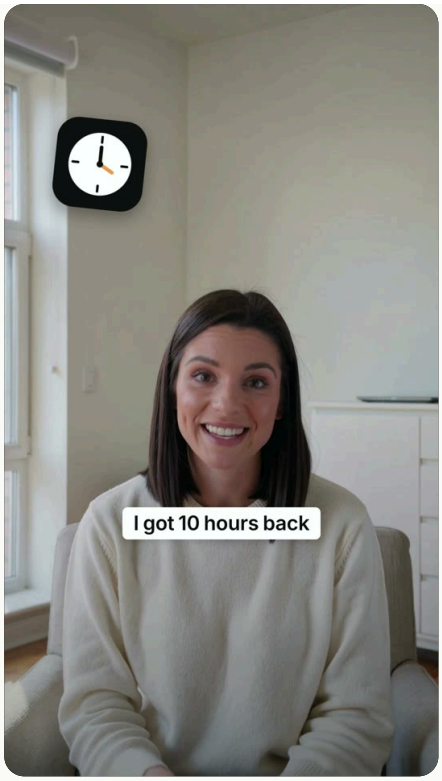

box, as-is case, 4 words max

GRADE

`sepia(.16) hue-rotate(16deg) saturate(.7) contrast(1.06) brightness(.95)`

DEFAULT COLORS

Native

White box captions that fill in as spoken, heavy caps hook with an orange italic accent, stickers and tags, true-to-life grade.

USE FOR

Tutorials, tools, quick tips. Looks like it was made in the app.

CAPTIONS

box, as-is case, 5 words max

GRADE

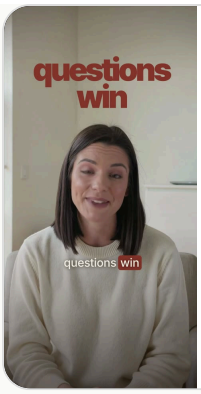

`saturate(1.03) contrast(1.03) brightness(1.01)`

DEFAULT COLORS

Animations library

Every effect here lands on its word, passes the layout audit, and takes your colors and fonts. Tap "Use it" for the spec.

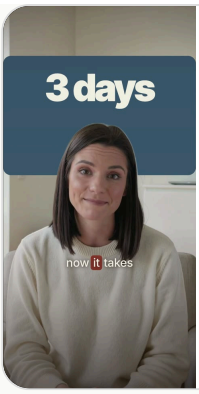

TEXT OURS

Big words

Lands the payoff word or two of a line, huge, behind the head.

Never: Never as gap filler on a non-payoff word. Never on a wide shot. Parallel lines get one shared size (max_size).

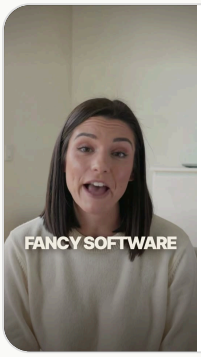

TEXT OURS

Color hop cards

A run of 2 to 5 short beats: the three numbers of a result, the steps of a method, a before and after price. One word or number per beat.

Never: Never more than two words on a card. Never filler words. Never a beat that does not land on its own spoken word.

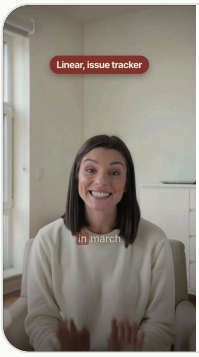

TEXT OURS

Digital zoom

One word carries the line (a verdict, a number, a name). The frame punches in on the face as it is said.

Never: Never twice in a row. Never during a behind-the-head word or a wall window (those stay put while the footage zooms).

TEXT CLAUDE-REEL-EDITOR

Label tag

The speaker drops a name the viewer may not know (a brand, a tool, a person). The tag says what it is.

Never: Never just the spoken name repeated: it must add what the thing is ("Notion, the notes app"). Never over a face.

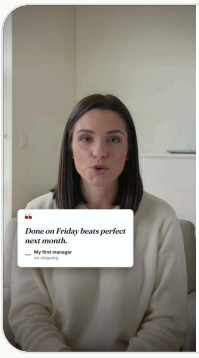

TEXT OURS

Letter drop

One short payoff word lands the line ("money.", "time.", "soon."). Use it once or twice a reel, on the word itself.

Never: Never a filler word. Never more than 10 letters. Never on a wide shot.

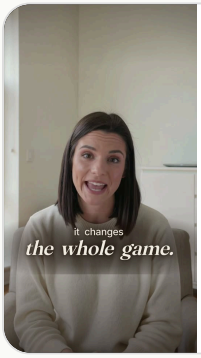

TEXT OURS

Quote card

The speaker quotes someone else, or cites a line from a book, a boss or a review. Show who said it.

Never: Never the speaker's own sentence restated (that is the serif effect). Never without attribution.

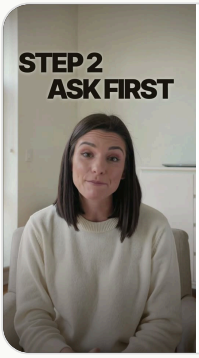

TEXT OURS

Serif line

The one line of the clip worth reading twice: a small lead-in, then the big payoff.

Never: Never clear before its last word is said. Never two on screen. No sparkles.

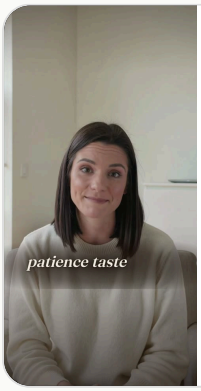

TEXT CLAUDE-REEL-EDITOR

Title card

The speaker starts a new section or names what is coming: "step two", "the fix", "three rules". The title names it.

Never: Never the sentence being said, word for word (that is the serif effect). Never in the first two seconds (the hook owns them).

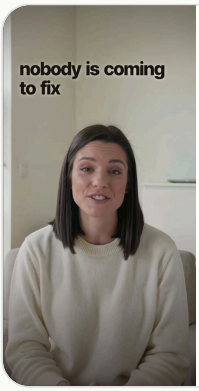

TEXT OURS

Word trio

The speaker lists two to four parallel things in one breath.

Never: Never for a list that is not said out loud in order. Each word waits for its own beat.

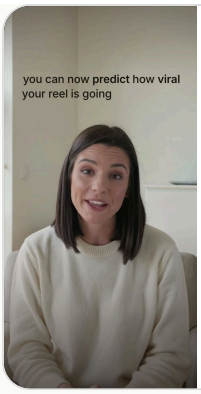

CAPTIONS CLAUDE-REEL-EDITOR

Follow caption

One short sentence that carries the reel (the hook line or the payoff) gets the full frame, each word landing as it is said.

Never: Never more than 12 words. Never twice in a row, and never next to a serif line (they do the same job). Never over a face.

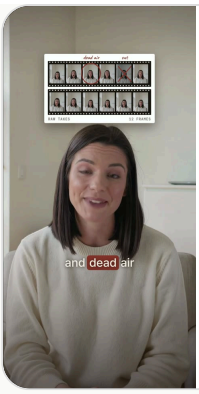

CAPTIONS OURS

Word build

A sentence that carries the reel and has one key phrase ("Claude can now predict how viral your reel is gonna be before you even post it").

Never: Never more than three lines. Never a marker on a filler word: mark the phrase that is the point.

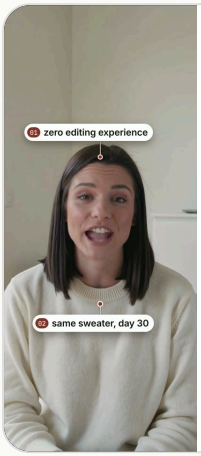

ANNOTATION OURS

Contact sheet markup

The speaker talks about raw footage, takes or the cut: "I drop in the raw footage", "the bad takes", "it finds the dead air".

Never: Never marks with no meaning: each circle or cross has a label or a spoken reason. Never covers a face.

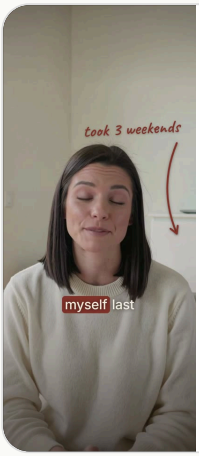

ANNOTATION OURS

Freeze and label

The speaker says something about themselves or what is in frame that a label can name (a role, an object, a before state).

Never: Never labels that repeat the caption. Never more than three. Never on a cut (the frozen frame is the shot on the word).

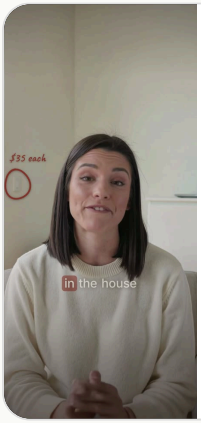

ANNOTATION OURS

Hand-drawn arrow

The speaker refers to something visible in the shot (an object, a sign, a part of the room, a line inside another graphic). The arrow points at it and the label adds what it is.

Never: Never at the speaker's face (that is the note effect). Never across a cut: the target moves when the shot changes. Never a label that repeats the spoken words.

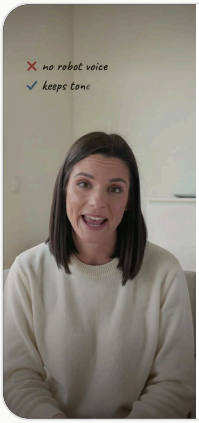

ANNOTATION OURS

Hand-drawn circle

The speaker refers to one thing in the shot or inside another graphic (a sign, a product, one line of a screenshot). A marker circle or underline picks it out.

Never: Never around a face. Never across a cut: the target moves when the shot changes. Never a label that repeats the spoken words.

ANNOTATION OURS

Handwritten lines

A quick pro and con or a before and after in a few words ("no robotic voice, keeps my tone"), or a handwritten subtitle under the hook.

Never: Never more than 3 lines. Never a line that only repeats the caption word for word: a cross or check adds the verdict, or the line adds the detail.

ANNOTATION OURS

Handwritten note

Adds a fact the speaker does not say (a number, a name, a date).

Never: Never echo words spoken within 2 s. Never point at nothing: the arrow lands on the speaker.

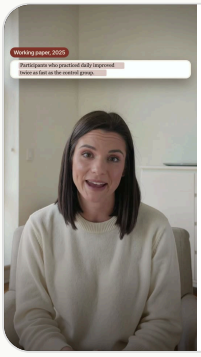

ANNOTATION OURS

Rubber stamp

A request, document or application gets a verdict the speaker names: approved, requested, rejected, signed, paid, sold out.

Never: Never a verdict nobody says or implies. Never a stamp on an empty card: the card names the document.

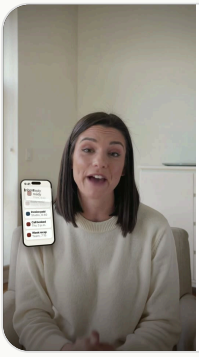

ANNOTATION OURS

Study screenshot

The speaker cites a study, report or document and one line of it is the proof.

Never: Never a header so small the title cannot be read (it is dropped instead). Never a line hidden behind a head.

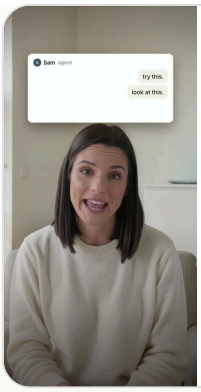

APP WINDOWS OURS

3D phone with breakouts

The speaker talks about an app, a feed, an inbox, a result on a phone; the rows that pop out are the things she names.

Never: Never an app the speaker does not mention or imply. Never rows that only repeat the caption. Never covers a face.

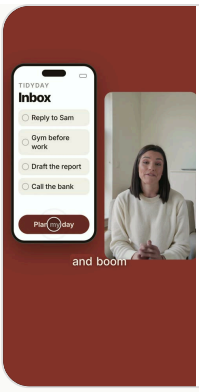

APP WINDOWS OURS

Agent chat

The speaker describes talking to a named AI agent or teammate: what they asked, what it answered.

Never: Never messages that were not described. Each lands on its own spoken phrase.

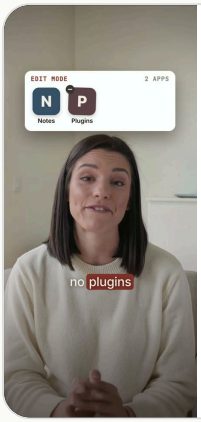

APP WINDOWS OURS

App screen tour

The speaker walks through using an app: open it, tap, get the result. Each screen lands on the words that describe it.

Never: Never a screen nobody describes. Never more than four screens. Never stacked with a behind-the-head word (in a split the speaker moves into a card).

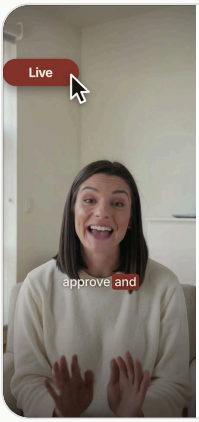

APP WINDOWS OURS

App tray delete

The speaker lists tools they no longer need ("no CapCut, no Edits app, nothing"). Each icon goes on its own name; the end word lands the payoff.

Never: Never icons the speaker does not name. Never real logos you do not have rights to: pass your own icon files or use the letter tiles. Never covers a face.

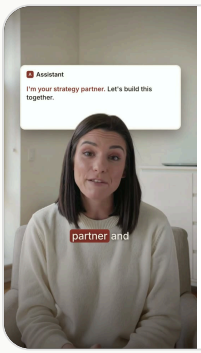

APP WINDOWS OURS

Big cursor click

The speaker describes one click that changed something: "I hit approve", "one click and it sent". Shows the button and what it turned into.

Never: Never a click on nothing. Never ripples, rings or glows on the click: the button press and its new label are the feedback.

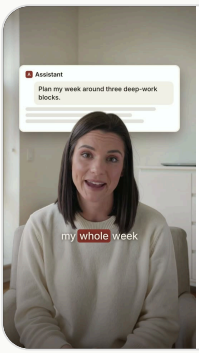

APP WINDOWS OURS

Chat bubbles

The speaker quotes a back-and-forth with an assistant or a person.

Never: Never invented replies. Each message lands on the words that describe it.

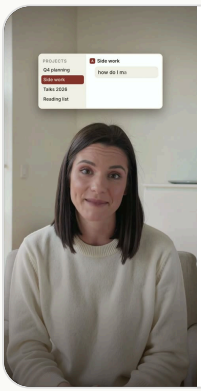

APP WINDOWS OURS

Chat prompt

The speaker describes asking an AI or app something. Show the exact ask.

Never: Never placeholder bars alone (a blank card). Never a prompt the speaker did not describe.

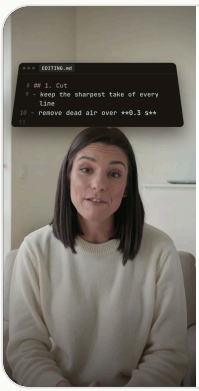

APP WINDOWS OURS

Chat sidebar

The speaker describes organizing work into projects or folders in an app, then asking inside one.

Never: Never a highlight on an item nobody names.

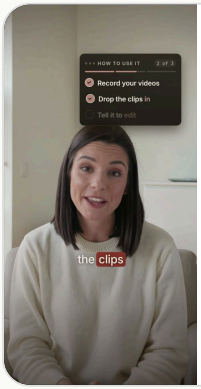

APP WINDOWS OURS

Code scroll

The speaker mentions a file, a prompt, a skill or instructions they wrote ("I wrote one file that tells it how").

Never: Never fake code that claims to be someone else's. Never a file nobody mentions. Lines must be real or plainly generic.

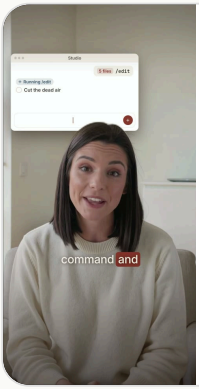

APP WINDOWS OURS

Dark app checklist

The speaker walks through how to do something in steps ("just record, drop the clips in, tell it...").

Never: Never steps the speaker does not say. Two to five steps, each ticked on its own phrase. Use the light checklist for a plain list of things.

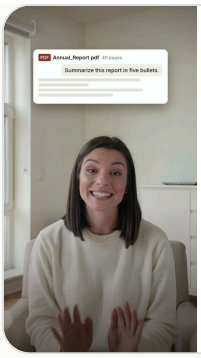

APP WINDOWS OURS

Desktop app window

The speaker describes the whole workflow in one breath: "drop the clips in, type the command, it sends back the edit".

Never: Never branded as a real product (no real app names, logos or colours). Never steps the speaker does not describe.

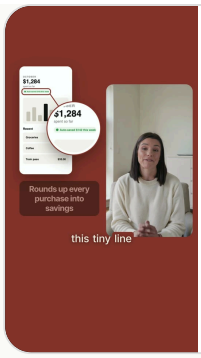

APP WINDOWS OURS

Document + prompt

The speaker hands a document to an AI: a PDF, a deck, a contract.

Never: Never placeholder bars alone. The file name and the ask come from what was said.

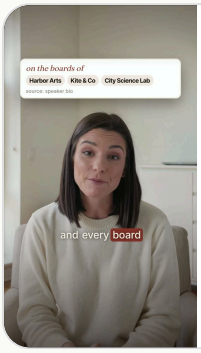

APP WINDOWS OURS

Feature callout

The speaker points at one detail of an app or page that is too small to read at full size: a setting, a number, a button.

Never: Never a label that repeats the caption word for word. Never a region you could read without the lens.

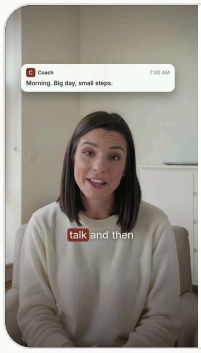

APP WINDOWS OURS

List card

The speaker refers to a set of names you can list: boards, clients, cities.

Never: Never a list that is not sourced. Put the source line on the card.

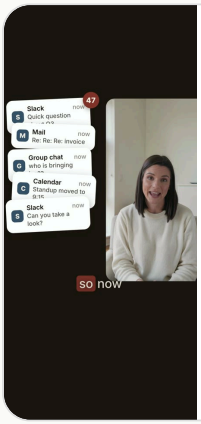

APP WINDOWS OURS

Notification stack

The speaker describes an app, agent or person pinging them.

Never: Never more than three. Never a notification text nobody describes.

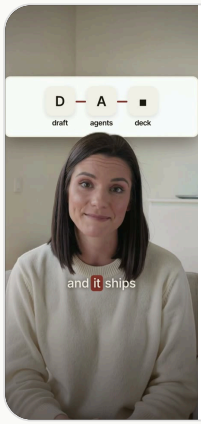

APP WINDOWS OURS

Pain to fix

The speaker describes the mess before (pings, tabs, tasks everywhere) and then the one thing that replaces it. Show the pain so the fix lands.

Never: Never a before nobody describes. Never more than six before items. The after card is one card, not another list of everything.

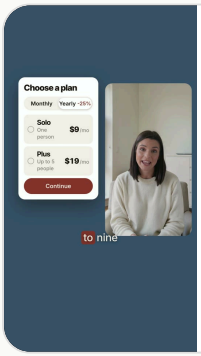

APP WINDOWS OURS

Pipeline

The speaker walks through a workflow: this tool, then that one, then the result.

Never: Never more than five nodes. Every node lands on its own spoken word.

APP WINDOWS OURS

Pricing card

The speaker names a price, a plan, or what the yearly plan saves. The prices on screen are the real ones.

Never: Never invented prices. Never a rolling counter: a price changes as a whole new state. Never more than three tiers.

APP WINDOWS OURS

Prompt card

The speaker gives the viewer a prompt to copy ("paste this into Claude") and one line of it is the part that matters.

Never: Never a prompt the speaker does not offer. Never a highlight on a line that is not the point. Never covers a face.

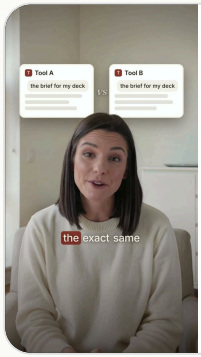

APP WINDOWS OURS

Receipt print

The speaker gives an instruction, an order or a short list and the exact words matter ("I told it: take a pass at editing this").

Never: Never paraphrase: the lines are the real words. Never more than 4 lines. Never covers a face.

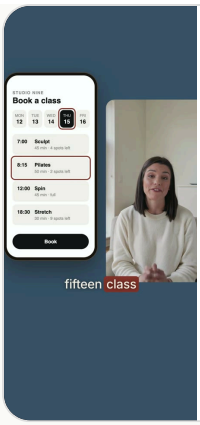

APP WINDOWS OURS

Side by side

The speaker compares two tools on the same task.

Never: Never two windows of grey bars: each shows the real ask.

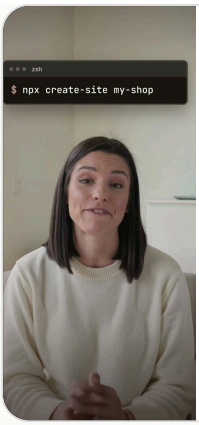

APP WINDOWS OURS

Tap sequence

The speaker says the exact steps in an app ("pick a day, pick a class, book"). Each tap lands on its step.

Never: Never taps the speaker does not describe. Never more than three taps. Never a screenshot with private data you have no right to show.

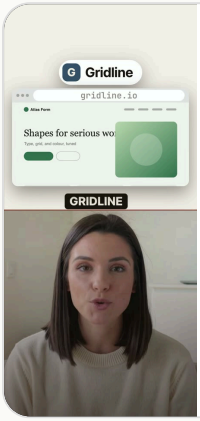

APP WINDOWS OURS

Terminal command

The speaker runs, installs or names a command ("I just ran npm create", "one line in the terminal"). Show the exact command and what it printed.

Never: Never a made-up command or fake output for a real tool. Never more than four output lines. Never code to read (that is a code scroll).

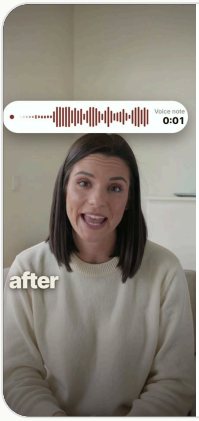

APP WINDOWS OURS

Tool roll call

The speaker runs through 2 to 5 tools or sites by name ("I use A, B, and C"). Each one shows on its own name.

Never: Never a tool the speaker does not name. Never real logos or site captures you have no rights to show: pass your own captures and icon files, or use the letter tiles. Never covers a face.

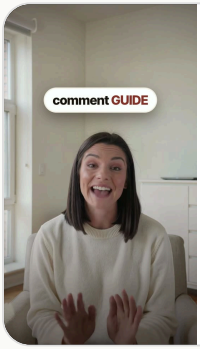

APP WINDOWS OURS

Voice waveform

A voice feature: the speaker talks to an app, dictates, records a note. The words she says become the transcript on screen.

Never: Never over a line that is not the voice input itself. Never over 6 seconds (it replaces the captions).

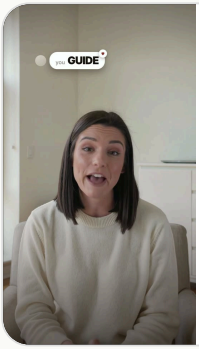

SOCIAL CLAUDE-REEL-EDITOR

Call to action

The speaker asks for an action at the end: comment a keyword, save, share, DM. The pill spells the exact ask.

Never: Never an ask the speaker does not make. One per reel, at the end.

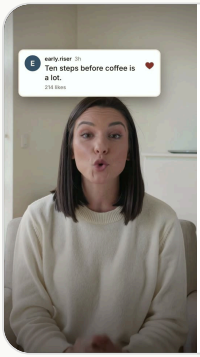

SOCIAL OURS

Comment for the link

The end call to action: "comment X and I will send you the link".

Never: Never a keyword the speaker does not say. Never a link label that promises something the post does not give.

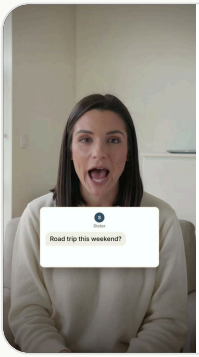

SOCIAL OURS

Comment popup

The speaker quotes or reacts to a comment someone left. Show the comment and who wrote it.

Never: Never a comment the speaker does not mention. Never over a face. One comment at a time.

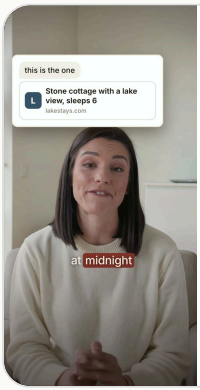

SOCIAL OURS

DM bubbles

The speaker says someone texted or messaged them, or what they texted back.

Never: Never a message the speaker does not describe. Two or three bubbles at most.

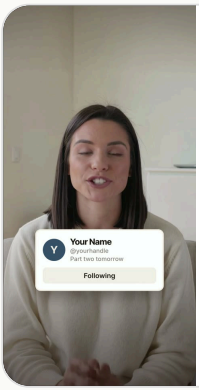

SOCIAL OURS

DM with link preview

The speaker says someone sent them a link, or that they sent one: an article, a listing, a product page. The card names the page.

Never: Never a page nobody describes. Never a plain text message (use popup-dm). One bubble only.

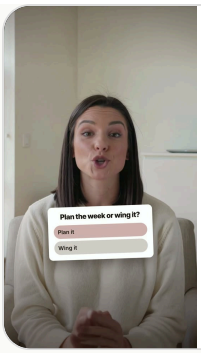

SOCIAL OURS

Follow card

The speaker says "follow me", names an account to follow, or says someone followed them.

Never: Never an account nobody names. Never a fake follower count.

SOCIAL OURS

Poll sticker

The speaker asks the audience a this-or-that question, or cites a split vote or survey.

Never: Never a made-up result presented as real data. Two options only.

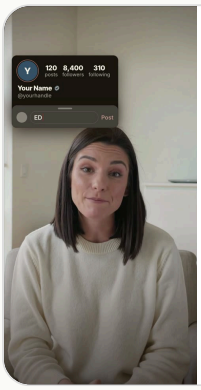

SOCIAL OURS

Post card

The speaker cites a post someone wrote. Show the exact words and who posted them.

Never: Never a platform logo or trademark. Never invented counts presented as real.

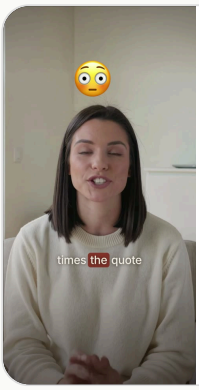

SOCIAL OURS

Profile follow

The call to action: "follow me and comment X". Shows the account, the tap, and the word to comment.

Never: Never stats or a verified mark the account does not have: both show only when params give them. Never someone else's account without their say.

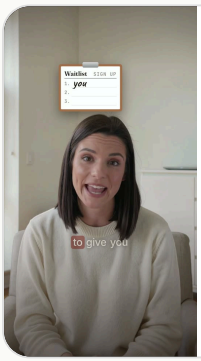

SOCIAL OURS

Reaction emoji

A beat with a clear emotional reaction the emoji names better than words (shock, laughing, a hard no).

Never: Never more than one emoji. Never glows, sparkles or particles. Never two in a row.

SOCIAL OURS

Sign-up sheet

Putting a name down: "put your name on the list", "sign up", "RSVP". The written word is who signs (you, a name) and the tag is the deal.

Never: Never a deal nobody offers (the tag is optional). Never covers a face.

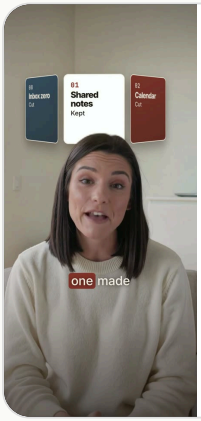

SOCIAL OURS

Take a number

A waitlist, a queue or a place in line: "join the waitlist", "first in line", "you are number 12".

Never: Never a position nobody offers. Never covers a face.

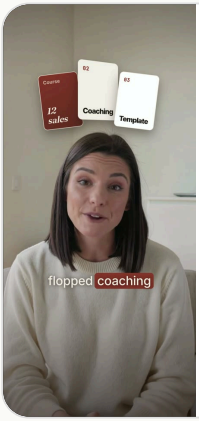

CAROUSELS OURS

3D cylinder carousel

The speaker runs through a set of options, steps or names; the cylinder turns to each one as it is said.

Never: Never cards the speaker does not name or imply. Never on a close-up where the head fills the top of the frame (there is no band above the head; the build moves it under the chin or refuses).

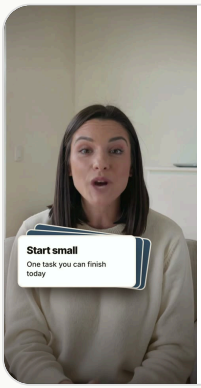

CAROUSELS OURS

Card fan with flips

The speaker reveals something about each of 3 to 5 things in turn (a result per option, an answer per question).

Never: Never a back that repeats the front or the caption. Never more than 5 cards. Never covers a face.

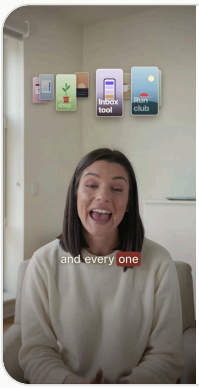

CAROUSELS OURS

Card stack

The speaker reveals 2 to 5 points one at a time, where each one lands as its own beat.

Never: Never points the speaker does not make. Never more than 5 cards.

CAROUSELS HYPERFRAMES-REGISTRY

Circle carousel

A set of 6 to 12 things circling the speaker (tools, places, products) while she names the group.

Never: Never tiles the speaker does not name or imply (no stock filler). Never on a line where the face turns away.

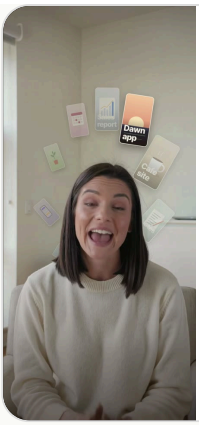

CAROUSELS OURS

Orbit carousel

The speaker names a set of things (reels, results, places, offers) and the set itself is the point: 5 to 8 phone tiles orbit the head while the line lands.

Never: Never tiles the speaker does not name or imply. Never fewer than 5 tiles (it reads as a broken ring). Never on a line where the face turns away (nothing to orbit).

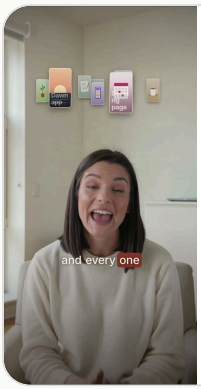

CAROUSELS HYPERFRAMES-REGISTRY

Path carousel

A sequence with a direction (a timeline, a funnel, steps): 6 to 12 cards travel over the head from one shoulder to the other.

Never: Never tiles the speaker does not name or imply (no stock filler). Never on a line where the face turns away.

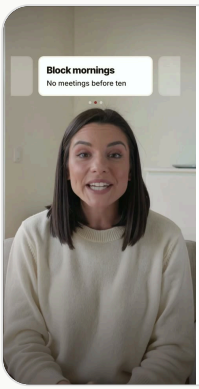

CAROUSELS HYPERFRAMES-REGISTRY

Sphere carousel

A set of many things (work samples, clients, posts) where the volume is the point: 8 to 16 tiles swirl behind the head.

Never: Never tiles the speaker does not name or imply (no stock filler). Never on a line where the face turns away.

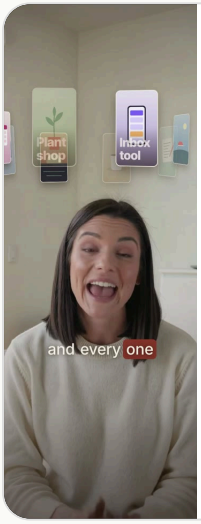

CAROUSELS OURS

Swipe carousel

The speaker lists 3 to 5 parallel points (tips, options, reasons) one after another.

Never: Never points the speaker does not make. Never more than 5 cards. Never one line per card that only repeats the words.

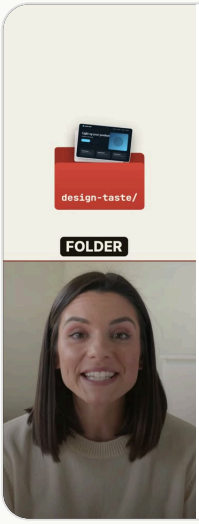

CAROUSELS HYPERFRAMES-REGISTRY

Vision ring carousel

A gallery moment: 6 to 12 big image or word cards (portfolio, results, destinations) sweeping across the band behind the head.

Never: Never tiles the speaker does not name or imply (no stock filler). Never on a line where the face turns away.

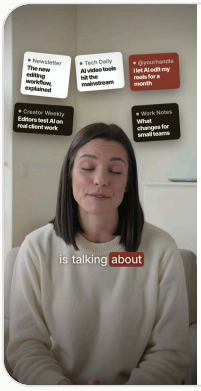

MEDIA OURS

Folder collect

The speaker gathers examples into one place ("I screenshot sites I love and drop them in one folder"), optionally then hands that folder to a tool ("then I give the folder to Claude").

Never: Never screenshots of sites the speaker does not mention or own the rights to show: use their own captures or plainly generic mocks. Never real app logos you have no rights to: pass your own icon file or use the letter tile. Never covers a face.

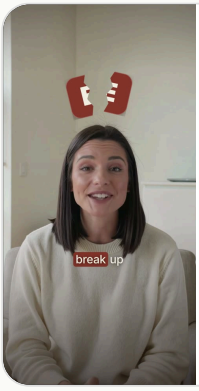

MEDIA OURS

Headline wall

The hook says everyone is talking about something. Real headlines or post titles prove it.

Never: Never invented headlines presented as real: use real titles and sources, or plainly generic ones. Never on a close shot with no wall above the head.

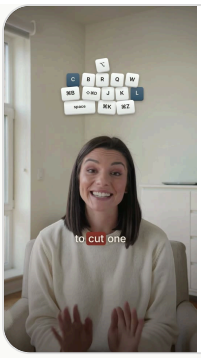

MEDIA OURS

Icon break-up

The speaker quits, replaces or breaks up with a named tool ("you can break up with X", "I cancelled X", "X is done").

Never: Never a tool nobody names. Never a logo you have no rights to: use your own icon file or the letter tile. Never covers a face.

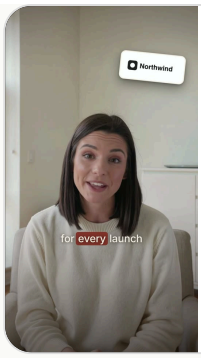

MEDIA OURS

Keycap rain

The speaker talks about keyboard work, shortcuts or hours of manual editing ("all the shortcuts", "I used to do it by hand").

Never: Never random letters: the keys are real shortcuts for the task. Never more than 18 keys. Never covers a face.

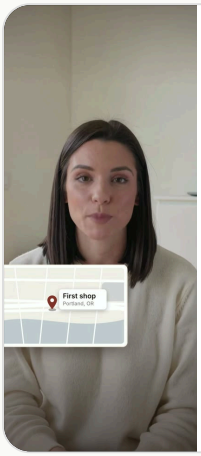

MEDIA OURS

Logo

A company, product or brand is named out loud.

Never: Never a logo nobody says. Never on top of the hook card. Never over a face.

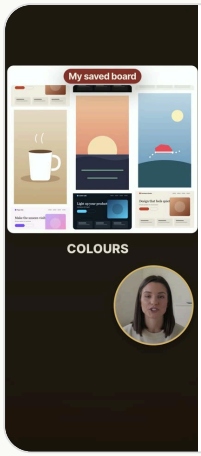

MEDIA OURS

Map pin

The speaker names a city, neighborhood or venue where something happened.

Never: Never a place nobody names. The map is a sketch, not a real street layout; do not imply directions.

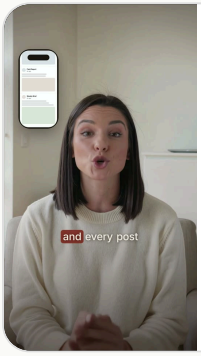

MEDIA OURS

Masonry moodboard

The speaker talks about collecting inspiration or references ("I save everything to one board").

Never: Never other people's images presented as the speaker's own work: use their saved references with credit, or plainly generic art. Never a platform logo you have no rights to: the pill is plain text. Never covers a face.

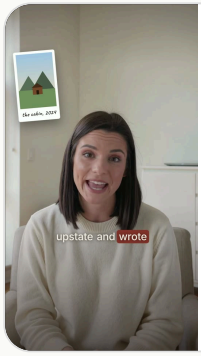

MEDIA OURS

Phone scroll

The speaker talks about a feed, a long page, an app or a thread you can show scrolling.

Never: Never a short image (use screenshot). Never a page with private data you have no right to show.

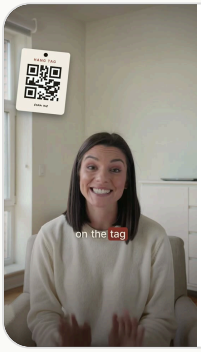

MEDIA OURS

Photo

The speaker names a person, place or thing you have a real photo of.

Never: Never a photo of the speaker who is already on screen. Never over a face.

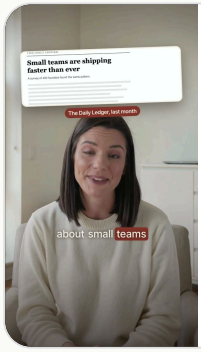

MEDIA OURS

QR hang tag

The speaker mentions QR codes, tags, or scanning something in a store.

Never: Never a real-looking code that points somewhere: the pattern is decorative.

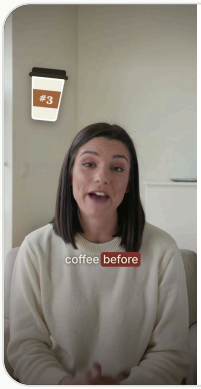

MEDIA OURS

Screenshot

The speaker cites something you can show: an article, a post, a page.

Never: Never a screenshot whose title is hidden behind a head. Never unreadable small text.

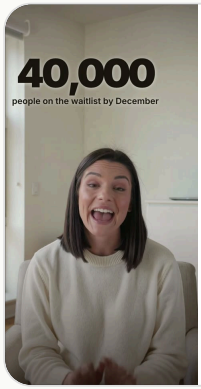

MEDIA CLAUDE-REEL-EDITOR

Sticker

The speaker names a thing you have a clean cut-out of (an object, a badge, a product). Shows the literal noun.

Never: Never decoration with no noun behind it. Never a photo with a background (use photo). Never over a face.

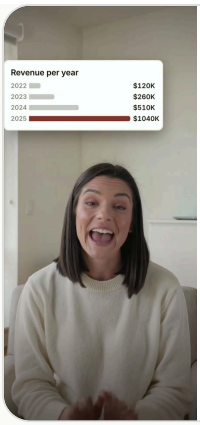

DATA OURS

Big count-up

One number carries the line ("we hit 40,000 users", "it cut 90% of the work"). The hero number counts up; the label says what it counts.

Never: Never a number nobody says. Never two in a row (use stats for a set). Never glows on the number.

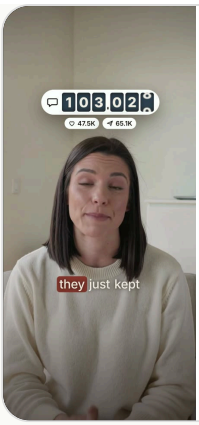

DATA OURS

Chart

The speaker compares a few numbers or describes a trend over time ("revenue doubled three years running"). The chart shows the exact values.

Never: Never invented or rounded data: print the values you were given. Never more than 7 points. Never a chart without a title saying what it measures.

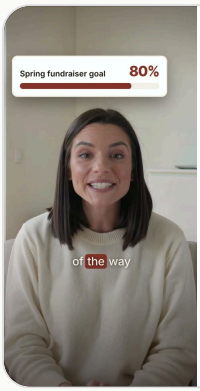

DATA OURS

Live counter

A count that is still climbing matters to the line: comments pouring in, sign-ups ticking, views running up. The numbers are real.

Never: Never an invented count. Never for a fixed number (use count-up). Never covers a face.

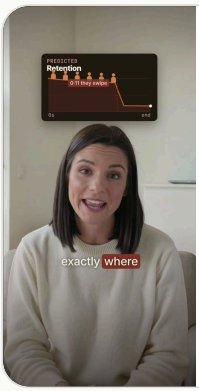

DATA OURS

Progress bar

The speaker says a share, a completion rate or progress toward a goal ("we are 80% there").

Never: Never a number nobody says. One bar per beat.

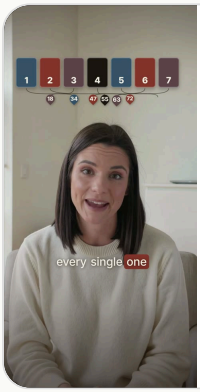

DATA OURS

Retention cliff

The speaker names the moment people drop off: viewers swiping, users churning, readers leaving ("it shows exactly where people would fall off").

Never: Never an invented curve: pass the real points or the real drop second. Never covers a face.

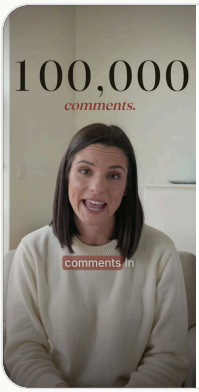

DATA OURS

Score pins

The speaker scored or ranked a set of things ("I ran seven hooks through it and it scored every one between zero and 100").

Never: Never invented scores. Never more than 8 items. Never covers a face.

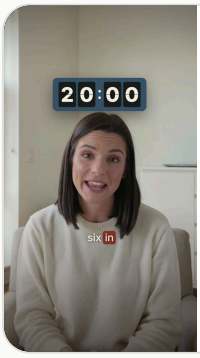

DATA OURS

Slot reel number

One big round number is the whole point of the line ("a hundred thousand comments", "two million views"). The unit word says what it counts.

Never: Never a number nobody says. Never more than 9 characters. Never on a wide shot (the heads cover the band).

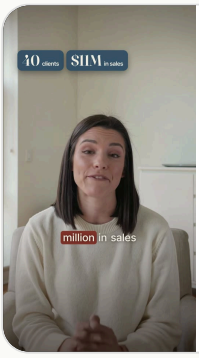

DATA OURS

Split-flap clock

Hours pass or a schedule runs: "from six a.m. to midnight", "every waking hour", "it ran all night". The times are real.

Never: Never times the story does not give. Never more than 8 steps. Never covers a face.

DATA OURS

Stat chips

The speaker says numbers or a short list of hard facts.

Never: Never a number nobody says. Clears before the next graphic lands.

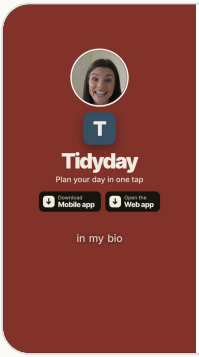

DATA OURS

Tear-off calendar

Days pass in the story: "over the weekend", "three days later", "by Monday". Each page is a real date or day.

Never: Never dates the story does not have. Never more than 4 pages. Never covers a face (it sits above the head or beside it).

STRUCTURE OURS

App endcard

The last line of a product reel: where to get the app. Use it once, at the end.

Never: Never store trademarks or official badge art (the badges are generic "Download" buttons). Never more than one line under the name.

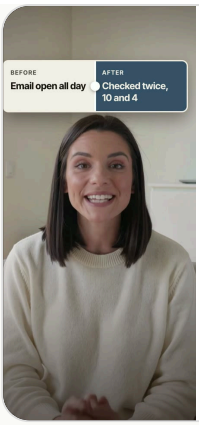

STRUCTURE CLAUDE-REEL-EDITOR

Backdrop swap

A reveal or a turn in the story ("don't worry", "here is the fix"): the background drops to a brand color or a relevant image behind the speaker, with one or two big words.

Never: Never without a speaker cutout. Never more than once or twice a reel. Never words that only fill space: name the turn.

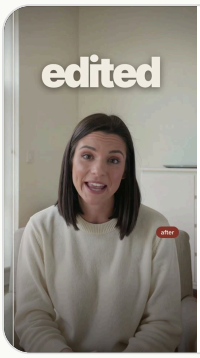

STRUCTURE OURS

Before and after

The speaker contrasts how it was with how it is now (a process, a number, a habit).

Never: Never a contrast the speaker does not make. Short sides, four lines at most each.

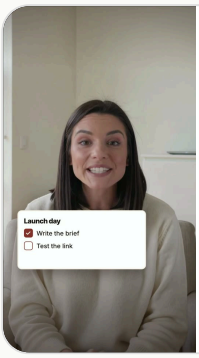

STRUCTURE OURS

Before and after wipe

The speaker talks about the edit, the look, or a change they made ("what it sent back", "after", "edited").

Never: Never when nothing changed. The big word names the result; never a word the caption already shows on its own.

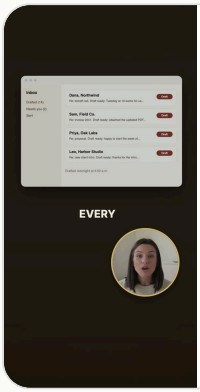

STRUCTURE OURS

Checklist

The speaker walks through steps, requirements or things they did, one after another.

Never: Never items the speaker does not say. Two to five items, each on its own phrase.

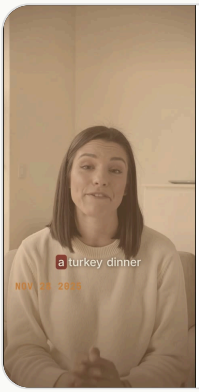

STRUCTURE OURS

Face bubble

The thing on screen matters more than the face for a few seconds (a site, a tool, a feed), but the speaker should stay present.

Never: Never under 1.8 s. Never across a shot cut. Never twice in a row: the second one reads as a broken frame.

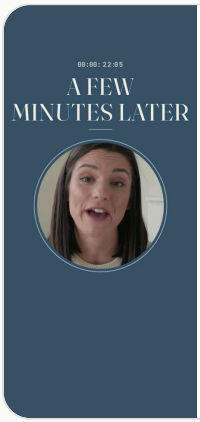

STRUCTURE OURS

Film memory

A memory or a past moment the speaker tells as a story ("last Thanksgiving", "back in 2019", "when I was a kid"), or a line about film itself.

Never: Never for the present tense. Never more than once a reel. The date stamp, if any, is the real date or place.

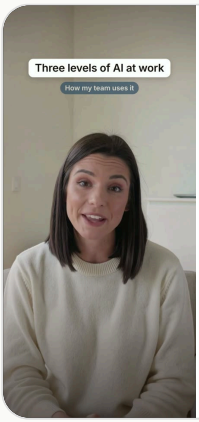

STRUCTURE OURS

Iris card

A chapter turn or a time skip: "a few minutes later", "so here is what I am doing", "and the captions read like a movie script".

Never: Never more than once or twice a reel. Never a title that only repeats the caption with nothing added (a timecode or a chapter name adds).

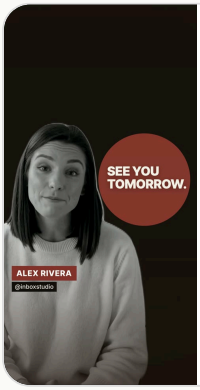

STRUCTURE OURS

Pinned title + chapters

A reel built in parts ("levels of AI users": where it lives, how I build, how my team uses it) or a series tag that should stay up the whole time.

Never: Never a title that changes nothing about how the reel reads. Never more than 5 chapters. Keep other graphics out of the top band while it is pinned.

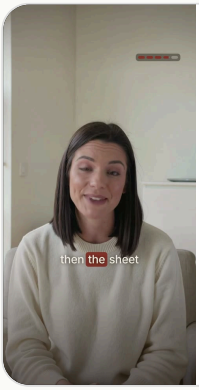

STRUCTURE OURS

Poster end card

The sign-off: "see you tomorrow", "follow for part two", "that is the whole system". Last thing in the reel.

Never: Never mid-reel (it reads as the end). Never a sign-off over 3 short lines. Never on footage without a cutout.

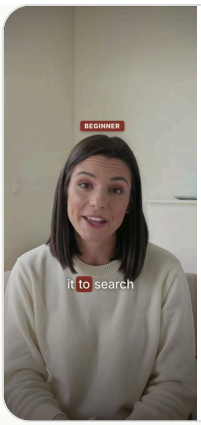

STRUCTURE OURS

Progress dots

A reel built as a numbered list or steps ("five tools", "three rules"): it shows where the viewer is and how much is left.

Never: Never for fewer than 2 or more than 8 chapters. Never with chapters the speaker does not clearly start (a segment that fills on nothing reads as a glitch).

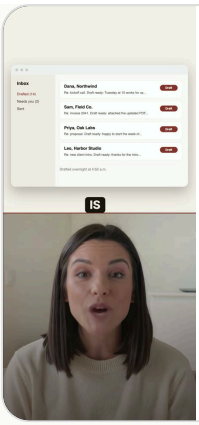

STRUCTURE OURS

Speaker tags

Two or three people in one shot, each standing for something (beginner, intermediate, expert; buyer and seller; host and guest).

Never: Never a label the viewer could not check against the people. Never more than 3 tags. Never covers a face.

STRUCTURE OURS

Split screen

The speaker walks through something you can show for a few seconds (a site, a tool, a doc) and the face should stay on screen the whole time.

Never: Never under 1.6 s (the slide in and out eats half of it). Never across a shot cut. Never a screenshot whose words are too small to read at half height.

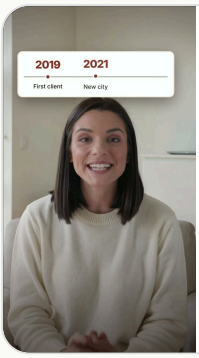

STRUCTURE OURS

Spotlight

One line that has to land: a confession, a rule, the payoff. The room goes dark around the speaker while they say it.

Never: Never more than once or twice a reel. Never on a line with a card or window on screen (it darkens them too).

STRUCTURE OURS

Timeline

The speaker moves through years, dates or stages in order.

Never: Never dates the speaker does not say. Two to five points, in order.

More from GitHub

Curated from the HyperFrames registry by HeyGen (Apache-2.0). Install one into a clip folder, then run /reel-qa on it, because these skip our build guards.

Instagram Follow SOCIAL

Instagram follow card pops in with avatar and a Follow button tap.

Use it when: You say "follow me" or name your handle.

```

The rules it follows

Each one came from a real round of review notes. The full story is in docs/LEARNINGS.md.

Hot takes, not topics.

A clip is one sharp claim and the line that pays it off. Length follows the thought, 20 or 90 seconds.

Every graphic adds something.

A note that repeats the caption is refused by the build. No sparkles, no glows, no filler words behind the head.

Show the noun on the word.

Named company, real logo. Named paper, real screenshot. It lands on the frame the word is said.

Sounds are literal.

Cash register on money, shutter on a photo, silence otherwise.

Nothing covers a face.

Placement reads the cutout and the face boxes. The audit blocks anything that slips through.

Fix the class, not the instance.

Every miss becomes a guard or an audit rule, tested on a broken clip.

Made by Natalia Correa. Built on HyperFrames (HeyGen, Apache-2.0) and faster-whisper (MIT). Ideas from master-skills and video-use (MIT), claude-reel-editor (MIT), and Marc at tenfold (inspiration only). Demo person and voice are AI-generated (Kling 3.0 on Higgsfield), not a real person. Sounds from Pixabay, downloaded on setup.
